| Sequoia          | Berkeley, CA       |
| Votation         |                    |

Information from FEC's established vendors of computerized vote tabulation systems (as of January 7, 2002).

The original list of voting equipment vendors was developed from a variety of sources (FEC, FES, NASED, as well as those vendors that responded to state RFPs). The first list was then limited to include only vendors that sell electronic equipment systems, as opposed to paper or punch card systems.

The information in the Comparison table represents responses received as of February 1, 2002.
