<sup>1</sup> This could include a variety of methods for generating clean and complete statewide voter rolls, including using data from the Department of Motor Vehicles, tax records and student lists.

<sup>2</sup> This could include a variety of measures such as requiring colleges to distribute registration forms to all students, submitting a list of students' current addresses to election administrators for the purpose of address verification or accepting college identification cards as a valid form of identification.

<sup>3</sup> Most states currently allow 17-year-olds to register to vote as long as they will be 18 by the next election. This question relates to supporting high school programs to perform these registrations and/or lowering the registration age to allow these programs to reach more students -- with the ambitious goal being registration of all students before they leave high school.

### **Voter participation comments:**

<sup>1</sup> I support broadening these two items further

<sup>2</sup> We need to implement HAVA as quickly as we can while ensuring that the steps we're taking do not disenfranchise voters.

### **Election Integrity and fairness comments:**

<sup>1</sup> I do not believe that one company should have a monopoly on all of the voting equipment used in the state. As long as local election administrators are purchasing equipment that meets the standards laid out by the legislature, they should be able to decide what would work best for their jurisdiction.

<sup>2</sup> We do not have provisional ballots in Minnesota, because we allow voters to register at the polls.

<sup>5</sup> Under the “top two” primary system the two primary candidates receiving the greatest number of votes advance to the general election, regardless of party affiliation. This system was recently adopted for primaries in Washington State.

<sup>6</sup> These “voting malls” were recently suggested by the Election Center’s National Task Force Report and are being adopted by certain counties in Colorado and elsewhere.

**Electoral reform comments:**

<sup>1</sup>Vote by mail is an option for small communities in Minnesota; I would like to study an expansion of its use.

<sup>2</sup>We have partial public funding in Minnesota; I support replacing our current system with a Clean Elections system.
